

AW TT Series

The Single Point, Wide Coverage Solution

Listening to music outdoors and in large interior spaces comes with inherent problems. When you move off-center, you lose the stereo imaging. And where do you place the speakers when there's no fixed listening position, and no "sweet spot"?

Well, the system designers at Proficient came up with the solution. With just one Proficient AW500TT, AW600TT, or AW800TT, you get even coverage throughout the listening area. Add more, and the sky's the limit—or is it?

"Twin Tweeter" technology overcomes the challenges of big, open spaces with super-wide coverage over long distances, plus an enhanced dispersion that conventional stereo speaker systems simply can't match. We call it "Constant Directivity."

The Dual Voice Coil Woofer, with combined left- and right-channel midrange and low-frequency information, really pumps out the bass—even at low listening levels. All of this adds up to the single point, wide coverage solution that the outdoor listening environment demands.

You'll call it amazing.

The Proficient AW Series brings you attractive, durable, "All Weather" speakers that are built to last. They'll take the heat – and the cold – for years to come.

Quality. Performance. Exactly what you'd expect from a premium brand like Proficient.
